	— A significant reduction of hard copy message requirements has taken place as a result of the SAFE and APARS (Automatic Printing and Reproduction System) enhancements. Through April 1984, APARS used approximately 2.5 million sheets of paper per month. Since May 1984, this has been reduced to approximately 1.6 million sheets per month.
	On 29 June the Air Force finished reviewing a number of NIEs on the South Asia area. This review project started in 1981 and consisted of 370 NIEs. A half dozen miscellaneous NIEs remaining to be reviewed. All the NIEs were considered declassifiable by the Agency but needed concurrences from the entire Intelligence Community.
